"Werner Hegemann (1881-1936), a German-born multidisciplinary critic of the built environment, was well known in Europe and the United States in his lifetime. A critic rather than a designer, he did not fit

Where To Download

easily into any school or category. To those seeking to promote modernism, Hegemann was something of an awkward figure - influential and undoubtedly authoritative but unorthodox. Today, however,

Where To Download

When studies of modernism have largely shed their proselytizing role, he is of great relevance. Our interest now is less in those who proposed the answers than in those who asked the questions - and particularly

the way in which
those questions
were framed. For
this Hegemann is
a key figure."

trends in civic
architecture and
planning, but
does not limit
itself to this;
time-honored
precedents, in
some cases
centuries old,
are referenced.
This massive,
encyclopedic
display, drawn
from over 200

international sources, has been carefully selected for use not only by trained professionals but for everyone involved in the shaping of cities and the built environment.

Numerous

examples culled
from the works
of such notable
architects as
Arata Isozaki,
Frank Gehry,
Robert A.M.
Stern, Rob
Krier, and many
others cover all
aspects of the
environment,
from large
regional

Where To Download

concerns down to
details of the
private realm.

This book brings
to light central
topics that are
neglected in
current
histories and
theories of
architecture and
urbanism. These
include the role

Where To Download

of imitation in
earlier
centuries and
its potential
role in present
practice; the
necessary
relationship
between
architecture,
urbanism and the
rural districts;
and their
counterpart in

Where To Download

the civil order
that builds and
uses what is
built. The
narrative traces
two models for
the practice of
architecture.
One follows the
ancient model in
which the
architect
renders his
service to serve

Where To Download

the interests of
others; it
survives and is
dominant in
modernism. The
other, first
formulated in
the fifteenth
century by Leon
Battista
Alberti, has the
architect use
his talent in
coordination

Where To Download

with others to contribute to the common good of a republican civil order that seeks to protect its own liberty and that of its citizens.

Palladio practiced this way, and so did Thomas Jefferson when he founded

Where To Download

A uniquely
American
architecture,
the counterpart
to the nation's
founding. This
narrative gives
particular
emphasis to the
contrasting
developments in
architecture on
the opposite
sides of the

Where To Download

English Channel.

The book
presents the
value for
clients and
architects today
and in the
future of
drawing on
history and
tradition. It
stresses the
importance,
indeed, the

Where To Download

urgency, of
restoring
traditional
practices so
that we can
build just,
beautiful, and
sustainable
cities and rural
districts that
will once again
assist citizens
in living not
only abundantly

Where To Download

but also well as
they pursue
their happiness.

The relationship
between culture
and urbanism has
been the focus
of much
discussion and
debate in recent
years. While
globalisation
tends towards a

Where To Download

homogeneity,
successful
'global cities'
have a strong
individual - and
particularly
cultural -
identity. The
economic value
of the culture
of cities lies
not only in the
arts taking
place there but

Where To Download

also in the
city's fabric,
its
architecture,
and in its
cultural
heritage. This
volume brings
together a team
of leading
specialists to
examine the
policies of
image and city

Where To Download

marketing which
have developed
over the past 15
years and
whether these
are a continuity
of earlier
strategies.

Featuring case
studies which
illustrate
diverse
perspectives on
linking culture,

Where To Download

urbanism and
history, the
book reviews
heritage and
planning
culture, looking
at the
experience of
urbanism in the
'Old Historic
City'. The book
also assesses
the increasingly
important issue

Where To Download

American images
and their
influence on
planning
strategies.
