~~Introduction To Applied Biogeography~~

An introduction to applied biogeography

Biogeography is about the geographical

distribution, both past and present, of

plants, animals and other organisms. Ian

Spellerberg and John Sawyer bring a modern

and new approach to an old subject, writing

in a lively and sometimes provocative manner.

Biogeography is the study of the distribution of species and ecosystems in geographic space and through geological time. Organisms and biological communities often vary in a regular fashion along geographic gradients of latitude, elevation, isolation and habitat area. Phytogeography is the branch of biogeography that studies the distribution of plants. Zoogeography is the branch that studies distribution of animals. Mycogeography is the branch that studies distribution of fungi, such as mushroom
