Beginners Guide To Programming The

A computer is a machine that processes  
and stores information. Programming is  
telling the computer how to ingest,  
process, and then store that data. When  
someone writes a program, that person is  
giving the computer a set of commands  
that it must follow. When we write  
programs, we are writing instructions that

# Online Library Beginners Guide To Programming The the computer will follow.
