How to Build a Cheap Chopper was originally written to give chopper builders of the day a way to build cool, functional choppers for cheap money. Instead of building bikes out of a catalogue, readers were encouraged to combine a donor bike with an aftermarket frame. With a Sportster or Metric bike as a foundation, and a hard-tail frame, a complete bike could be assembled for less than \$5,000, sometimes much less. Today, there's a whole new generation of riders looking to build simple, functional, unique choppers and bobbers based on everything from a 200cc Honda to the old classic Shovelhead or Panhead engines. No matter which drivetrain they choose, there remains the need to build bikes that work, bikes that are safe to ride, bikes that are fun! How to Build a Cheap Chopper- Revised starts with a look at the basics. The first chapters cover brakes, drivetrains, and frame geometry. The second half of the book shows readers how to actually assemble a bike. Four start-to-finish assemblies done at professional shops take the reader from a pile of parts to a finished, running motorcycle.

This book was produced to commemorate Buell Motor Company's 25th anniversary. Illustrated by hundreds of photographs from private collections and corporate archives, it covers Buell's history from inception to the present. Erik Buell is, of course, at the center of this inspiring story, but the company has thrived not just because of one energetic, visionary man, but because that man was able to inspire others around him to give 110 percent to their common objectives. This story is as much about the people of Buell as it is the motorcycles of Buell. Both, as you will learn, are remarkable.

Illustrated with 9 figures and 11 maps of the campaign and engagements at Perryville. The battle of Perryville symbolized the high-water mark of the Confederacy in the western theater of operations. In Aug. 1862 General Braxton Bragg and Major General (MG) Edmund Kirby Smith led separate armies into Kentucky to wrest the state from the Union and install a Confederate governor. They initially met success and captured the state capital, simultaneously shifting the war in the west from northern Mississippi and Alabama to Kentucky. In response the North raised additional forces to protect Cincinnati and Louisville while MG Don Carlos Buell halted his offensive against Chattanooga and marched his Army of the Ohio back to Kentucky. On 8 Oct. 1862 Buell's army clashed with Bragg's at Perryville. The Confederates achieved a tactical success in a hard-fought engagement that generated more than 7,000 casualties. Of the regiments engaged, 10 suffered losses between 40 and 60 percent. However, outnumbered by three to one, Bragg's army could not sustain its victory and withdrew. Within days of the battle, all of the invading Southern forces retired from the state. Kentucky remained firmly in the Union and secure from Confederate invasion for the war's duration. Despite its importance to the course of the war in the west, Perryville does not benefit from the high visibility accorded the better-known Civil War sites such as Manassas, Gettysburg, Antietam, and Chickamauga. Although more than 70,000 Union and Confederate soldiers deployed in and around Perryville, understanding of the battle and its significance to the overall course of the war remains poor. For staff ride purposes this unfamiliarity can be a benefit. It forces the participants to study and think about the situation facing their Civil War counterparts without the preconceived notions that surround the more popular sites.
