A collection of correspondence between Claude Eatherly, a former air force pilot, and Günther Anders, a German philosopher. Eatherly was the pilot who gave the all-clear for the dropping of the atomic bomb on Hiroshima: an action the implications of which he had not known at the time. Returning from the mission and learning of the devastating impact of the atomic bomb Eatherly was unable to calmly accept his role. Though he was treated as a hero in the press, Eatherly was morally distraught over his actions and felt that he could not silently accept the accolades. Over the course of some 71 letters Anders and Eatherly struggled with the problem of taking moral responsibility in a time when ethics were the last thing that most people seemed to want to discuss. Part of what fascinated Anders about Eatherly - and prompted the former to contact the latter - was precisely this way in which Eatherly sought to take responsibility for something which he easily could have ignored as having been a matter of "just following orders." *Burning Conscience* is a fascinating and troubling book - not simply because it provides a first-hand account of an oft untold moral story in the aftermath of World War II, but because the matters being discussed by Anders and Eatherly are as important today as they were during the lives of the correspondents.- Lib. Now fully updated, *Dyslexia and Inclusion* aims to equip all teachers with the necessary knowledge of dyslexia in order to for it to be effectively understood and dealt with in the classroom. The book is based around Reid's five signposts for successful inclusion - acknowledging differences, recognizing strengths, understanding what is meant by inclusion, planning for practice, and ensuring that the task outcomes are attainable. In identifying the key issues of inclusive practice, the book details current research whilst also providing support to meet the practical needs of the classroom teacher. This highly practical, topical and accessible text includes chapters on: effective learning curriculum access and differentiation whole school approaches specific approaches in reading, spelling, writing and numeracy. By understanding the crucial aspects of dyslexia, teachers can be pro-active and anticipate the type of difficulties they may encounter. This book will be beneficial to all teachers looking to support their students with dyslexia and help them to fulfil their potential in school and in the wider community.

Hiroshima is the story of six people--a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest--who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

An exploration of how technology and best intentions collide in the heat of war A New York Times Book Review Editors' Choice In *The Bomber Mafia*, Malcolm Gladwell weaves together the stories of a Dutch genius and his homemade computer, a band of brothers in central Alabama, a British psychopath, and pyromaniacal chemists at Harvard to examine one of the greatest moral challenges in modern American history. Most military thinkers in the years leading up to World War II saw the airplane as an afterthought. But a small band of idealistic strategists, the "Bomber Mafia," asked: What if precision bombing could cripple the enemy and make war far less lethal? In contrast, the bombing of Tokyo on the deadliest night of the war was the brainchild of General Curtis LeMay, whose brutal pragmatism and scorched-earth tactics in Japan cost thousands of civilian lives, but may have spared even more by averting a planned US invasion. In *The Bomber Mafia*, Gladwell asks, "Was it worth it?" Things might have gone differently had LeMay's predecessor, General Haywood Hansell, remained in charge. Hansell believed in precision bombing, but when he and Curtis LeMay squared off for a leadership handover in the jungles of Guam, LeMay emerged victorious, leading to the darkest night of World War II. *The Bomber Mafia* is a riveting tale of persistence, innovation, and the incalculable wages of war.
