Mass-action expression (reaction quotient or concentration fraction) is given the symbol Q . For a given reversible reaction: $a A + b B \rightleftharpoons c C + d D$, the mass-action expression (Q) is defined as $Q = \frac{[C]^c [D]^d}{[A]^a [B]^b}$, where the square brackets, $[\]$, refer to the concentration of that species in a certain phase.

Coenzyme Q, also known as ubiquinone, is a coenzyme family that is ubiquitous in animals and most bacteria (hence the name ubiquinone).

In humans, the most common form is Coenzyme Q 10 or ubiquinone-10. CoQ 10 is not approved by the U.S. Food and Drug Administration (FDA)
