over four decades ago when
Edward Teller began teaching

at the University of
Chicago. Then, as now, Dr.
Teller believes that
illiteracy in science is an
increasingly great danger to
American society, not only
for our children but also

future of every individual
on this globe is closely
related to science and its
applications. Fear of the
results of science, which
has become prevalent in much

to mistaken decisions in
important political affairs.
But this book speaks of no
fears and of no decisions—
only of the facts that can
prevent one of them and
indirectly guide the others.
