HIPAA: Privacy and Security for Healthcare. The Healthcare Insurance Portability and Accountability Act (HIPAA) was passed in 1996. Its primary goals were to modernize the flow of healthcare information and to ensure the security and privacy of electronic protected health information (ePHI). Strengthened by the HITECH act in 2009 and updated in 2013, HIPAA mandates technical, physical and administrative safeguards that must be implemented to control access to health-related information.
