After all the design procedure above has been completed, a draft sketch of structural framings or structural markups, its design and structural schedule shall be handed over to structural draftsman for him/her to interpret it into a structural drawing. In this stage, structural design engineer supervision is required to make sure that every detail in structural drawings is accounted for.

~~Basic Procedure of Structural Design | The Structural World~~

As the name suggests, the section drawings show the structure in a sliced form. This kind of construction drawing helps identify the primary structures in relation to other surrounding structures of the building. Further, section drawings also provide information for the types of materials to be used in the construction.

~~42 Types of Drawings Used in Building Design ...~~

A structural drawing, a type of engineering drawing, is a plan or set of plans and details for how a building or other structure will be built. Structural drawings are generally prepared by registered professional engineers, and based on information provided by architectural drawings. The structural drawings are primarily concerned with the load-carrying members of a structure.

A Structural Drawing or a Structural Plan is composed of structural details and a general arrangement plan or layout necessary for site construction proper. In these drawings all the details that we need to follow during site construction is being reflected. Although the preparation of the Structural Drawing is a structural draftsman's task, as a Structural Designer we should see to it that the proper drawing standard has to be followed and implemented.

Structural engineering is a sub-discipline of civil engineering in which structural engineers are trained to design the 'bones and muscles' that create the form and shape of man-made structures. Structural engineers need to understand and calculate the stability, strength and rigidity and earthquake of built structures for buildings and nonbuilding structures.

The UDOT Structures Design and Detailing Manual (SDDM) has been developed to provide the Structures Design staff and consultants with UDOT policies, procedures, practices and technical criteria. The SDDM consists of the written manual, drawings (working standards, structures design drawings, sample sheets), checklists and SDDM Revision Memoranda.

~~Structures Design and Detailing Manual | UDOT~~

Drafting, also spelled draughting, also called engineering drawing, graphical representation of structures, machines, and their component parts that communicates the engineering intent of a technical design to the craftsman or worker who makes the product.

~~Drafting | graphics | Britannica~~

Steel Structures Design and Drawing Lecture Notes INTRODUCTION When the need for a new structure arises, an individual or agency has to arrange the funds required for its construction. The individual or agency henceforth referred to as the owner then approaches an architect. The architect plans the layout so as to satisfy the functional
