Human-Centered Technology integrates human sciences with computer science to design computing systems with a human focus. Researchers studying HCTD broadly investigate how the relationship between people, groups, societies and technology can inform the design of computing systems that support human ' s activities and enrich their lives.

Human-Centered Technology | Michigan State University

Human-centered design is a creative approach to problem solving and the backbone of our work at IDEO.org. It ' s a process that starts with the people you ' re designing for and ends with new solutions that are tailor made to suit their needs. Human-centered design is all about building a deep empathy with the people you ' re designing for; generating tons of ideas; building a bunch of prototypes; sharing what you ' ve made with the people you ' re designing for; and eventually putting your ...
