teaching experience, Plesha, Gray, & Costanzo provide a visually appealing, “step-by-step” learning framework. The presentation is modern, up-to-date and student centered, and the introduction of topics and techniques is relevant, with examples and exercises drawn from the world around us and emerging technologies. Every example problem is broken down in a consistent “step-by-step” manner that emphasises a “Problem Solver's Approach” which builds from chapter to chapter and moves from easily solved problems to progressively more difficult ones. Engineering Mechanics is also accompanied by McGraw-Hill Connect which allows the professor to assign homework, quizzes, and tests easily and automatically grades and records the scores of the students' work. Most problems in Connect are randomised to prevent sharing of answers and most also have a “multi-step solution” which helps move the students' learning along if they experience difficulty. Engineering Mechanics, Statics & Dynamics, second edition, by Plesha, Gray, & Costanzo, a new dawn for the teaching and learning of statics and dynamics.

This item is a package containing Plesha Engineering mechanics: Statics 1e + Connect Access Card for Engineering Mechanics: Statics and Dynamics. Plesha, Gray, and Costanzo's Engineering Mechanics: Statics & Dynamics presents the fundamental concepts, clearly, in a modern context using applications and pedagogical devices that connect with today's students. The text features a five-part problem-solving methodology that is consistently used throughout all example problems. This methodology helps students lay out the steps necessary to correct problem-formulation and explains the steps needed to arrive at correct and realistic solutions. Once students have fully mastered the basic concepts, they are taught appropriate use of modern computational tools where applicable. Further reinforcing the text's modern emphasis, the authors have brought engineering design considerations into selected problems where appropriate. This sensitizes students to the fact that engineering problems do not have a single answer and many different routes lead to a correct solution. The first new mainstream text in engineering mechanics in nearly twenty years, Plesha, Gray, and Costanzo's Engineering Mechanics: Statics and Dynamics will help your students learn this important material efficiently and effectively.

This is a full version; do not confuse with 2 vol. set version (Statistics 9780072828658 and Dynamics 9780072828719) which LC will not retain.

Based upon a great deal of classroom teaching experience, Plesha, Gray, & Costanzo provide a visually appealing learning framework to your students. The look of the presentation is modern, like the other books the students have experienced, and the presentation itself is relevant, with examples and exercises drawn from the world around us, not the world of sixty years ago. Examples are broken down in a consistent manner that promotes students' ability to setup a problem and easily solve problems of incrementally harder difficulty. Engineering Mechanics is also accompanied by McGraw-Hill's Connect which allows the professor to assign homework, quizzes, and tests easily and automatically grades and records the scores of the students' work. structures and components using MATLAB® to execute numerical calculations and to facilitate analytical calculations. MATLAB® is presented and introduced as a highly convenient tool to solve problems for theory and applications in statics. Included are example problems to demonstrate the MATLAB® syntax and to also introduce specific functions dealing with statics. These explanations are reinforced through figures generated with MATLAB® and the extra material available online which includes the special functions described. This detailed introduction and application of MATLAB® to the field of statics makes Statics with MATLAB® a useful tool for instruction as well as self study, highlighting the use of symbolic MATLAB® for both theory and applications to find analytical and numerical solutions
