Adjusting your draw length is important when setting up a compound bow. A bow press may be required to adjust the draw length on your bow. Bow presses typically have to be mounted to a workbench or table. You then secure the bow limbs to the presses "fingers," and you can turn a crank that compresses the limbs.

Additional items can be purchased such as metal detectors (to find arrows in the grass) and maintenance equipment including fletching jigs, fletches and glue as the programme develops. For most venues, the archery equipment will need to be set up and taken down for each session. The storage unit should be dry and vermin free.

### A Guide to Setting up a New Club - Archery GB

To step up from the Genesis compound bow, consider the Diamond Prism Compound Bow. This setup comes in many colors, and with a sight, peep and rest. Unlike the Genesis, which has no let-off and draws like a recurve, the Diamond Prism has the true feel of a compound bow. Even though it costs \$300, understand that most compound setups cost twice that amount.

Amazon.co.uk | Archery

Compound Target Bows. Compound Bows are the most recent development in archery and the most energy efficient and mechanically advanced of bows. The cam system allows you to have a reduced pull weight when holding at full draw, added to this, release aids, magnifying scope sights, peep sights (a rear sighting aid fitted into into the string) and stabilisers make the Compound Bow the most accurate bow style.
