~~Adding Fractions with Mixed Fraction Answers~~

Rounding fractions helps students to understand fractions a little better and can be applied to estimating answers to fractions questions. For example, if one had to estimate $1 \frac{4}{7} \times 6$, they could probably say the answer was about 9 since $\frac{4}{7}$ is about $1 \frac{1}{2}$ and $1 \frac{1}{2} \times 6$ is 9.
