Half-Life of Pennyium Activity Purpose: To simulate the transformation of a radioactive isotope over time and to graph the data and relate it to radioactive decay and half-lives. Time will be analogous to trials for our experiment. Pre-Lab Questions: 1. What are the three main forces that exist in the nucleus of an atom? Which is/are repulsive

Lab: Half Life of Pennyium Background: Some naturally occurring isotopes of elements are not stable. They slowly decompose by discarding part of the nucleus. The isotope is said to be radioactive. This nuclear decomposition is called nuclear decay. The length of time required for half of the isotope to decay is the substance's half-life.

Half-Life : Paper, M&M's, Pennies, or Puzzle Pieces. Description: With the Half-Life Laboratory, students gain a better understanding of radioactive dating and half-lives. Students are able to visualize and model what is meant by the half-life of a reaction. By extension, this experiment is a useful analogy to radioactive decay and carbon dating.
