The practice of hand-coloring black-and-white photographs can be traced all the way back to the days of daguerreotypes, which predates Instagram creative filters by about 180-plus years. In a bid to add life to the putty-like tonality of many of the earliest print technologies, photographers would very carefully brush thin layers of color pigments mixed with gum arabic (or quicker-drying ...

All types of black and white (darkroom) prints will take coloured dyes and all matt prints will take pencils to differing degrees. The better the texture, the more the pencil has to abrade against. Inkjet prints may take dyes, though you would have to test your own papers, it ' s an area I ' ve only experimented with a little.

Hand-colouring of photographs - Wikipedia

Photography has come a long way since I can remember. In the 90s when I was in high school, I bought a disposable film camera nearly every week. I carried them with me everywhere and amassed a pretty impressive collection of random high school memories. My favorite disposable cameras were the black and white ones, which I liked to paint with a set of Dr. Ph. Martin ' s paint that my mom let me ...
