I've had a rough life, and unless it was so, I would not have even considered sharing my story since while writing I have found it hard to believe that I was so lost, so dark, so empty and as co-dependent as any other person in any other abusive relationship I have ever met; something I've never acknowledged before now. Don't worry though, I won't bore you with another sad story of childhood abuse and neglect, even though I was an unloved, emotionally and psychologically abused slave-child, which was pretty awful in my opinion if only because of being the one who had to live it; however, I do want to touch on those parts that I believe had the biggest impact on the forming of my mind. Those parts

that include the fear, favoritism, criticism, traumatic experiences and inner anger I grew up with, which led to the outward anger, hostility, anxiety, lack of self-esteem, neediness, co-dependency and depression I experienced for my entire adult life up until this point. My upbringing doomed me to seek love wherever I believed I could find it, starting-out by marrying the first man I ever dated in order to escape my abusive childhood home. My husband and I divorce four years later and in doing so, I abandon my first two children which leads to subjecting myself to drunkenness and sexual promiscuity, followed by seven years of torment from a violently abusive, lying, child-molesting, drug-addicted, alcoholic boyfriend whom I end-up marrying. of a Labradiva - Another Blonde Leading the Blind is the story of Saffron, who began working with Mark Carlson in September of 2012. While Saffron is certainly a well-trained Guide Dog, loving, loyal and devoted, she is not just another blonde. She is a Labradiva, a unique breed of Yellow Labrador. In Confessions of a Labradiva you will follow Saffron , as Mark does, from her birth at Guide Dogs for the Blind, through puppy raising and Guide Dog training and into a remarkable life as a working dog. That might be more than enough for most Guide Dog books, but not for Saffron the Labradiva! Mark Carlson, who did most of the actual writing relates how he, Jane and Musket came to welcome and love Saffron, who was as different from her big brother as could be. The main changes included: introduction of six new VED bands from 2009-10, bringing the total number of bands to 13; applying this new regime of 13 bands to existing cars on the road first registered on or after 1 March 2001; and introduction of a new rate of VED for new cars in the first year in which they are bought. The Environmental Audit Committee's aims in this report were to examine the projected environmental impacts of these changes, to review how fair these changes are, and to make recommendations to the Treasury as to how it should proceed. The Committee felt that there was nothing intrinsically wrong in the rebanding of cars registered since 2001 but that there was a lack of data about the financial impacts of these change on lower-income groups. The Treasury should have taken much greater care to explain the changes in VED in the Budget. If the point of green taxes is to change behaviour, they need to be properly publicised. In general, the Treasury needs to develop a proper communications strategy
