#5 Java Manual
Serialization*

Java provides a mechanism, called object serialization where an object can be represented as a sequence of bytes that includes the object's data as well as information

about the object's type and the types of data stored in the object.

Java - Serialization
- Tutorialspoint

Serialization in Java is a mechanism of writing the state of an object into a byte-stream. It is mainly used in Hibernate, RMI,

Download File PDF Java

JPA, EJB and JMS technologies. The reverse operation of serialization is called deserialization where byte-stream is converted into an object.
