The writer has been occupied with karst problems for 50 years and first visited China in 1977 as leader of a Royal Society delegation of British geomorphologists - the first delegation from the UK to visit China since the inauguration of the new China and at the end of the Cultural Revolution (Sweeting 1978). It was clear from that visit that a study of the Chinese karst would help our understanding of the problems of karst development and that many of the geomorphological difficulties which ...

Karst in China | SpringerLink

This is the first study of the karst areas of China to be carried out by a Western geomorphologist, and almost all the sources are from Chinese works, as yet unpublished in the West. Karst areas are sensitive to environmental influences and Chinese attempts to deal with these are discussed here, as are Chinese methods of studying karst since they differ somewhat from those in the West.

Karst In China Its Geomorphology And Environment

This morphlogy is not well developed across the West and North of China where there is less rainfall than the main karst region in the Southeast. China's karst regions are almost all formed in rocks of Devonian to Triassic age. Near Guilin the lowering of the base level, through uplift and river erosion, has formed prominent karst hills.

Geology of China - Wikipedia

Abstract. Karst rocky desertification is a process of land degradation involving serious soil erosion, extensive exposure of basement rocks, drastic decrease in soil productivity, and the appearance of a desert-like landscape. It is caused by irrational, intensive land use on a fragile karst geo-ecological environment.

Karst in China: Its Geomorphology and Environment ...

Marjorie Mary Sweeting, was a British geomorphologist specialising in karst phenomena. Sweeting had gained extensive knowledge on various typographies by travelling to places such as Greece, Australia, Czechoslovakia, United States, Canada, South Africa, Belize, and most notably China. She published Karst Landforms, and Karst in China: its Geomorphology and Environment after many years of work there starting in 1977; the latter is the first comprehensive Western account of China's karst. She cre
