LEARNING GNU EMACS is an introduction to the most powerful text editor ever made, a fully-programmable environment that through contributions from thousands has become something of an operating system in itself. This third edition covers all the new enhancements made in version 21.3.

"A guide to the world's most extensible, customizable editor"--Cover.

Carries readers from the beginning through the proficient stages of learning the GNU Emacs editor, covering everything from simple text editing to moderately complicated customization and programming. Original. (Advanced).

An introduction to GNU Emacs editos, one of the most widely used and powerful editors available under UNIX. Provides a solid introduction to basic editing, a look at several important "editing modes", and a brief introduction to customization and Emacs LISP programming.

"This book introduces Emacs Lisp and tells you how to make the editor do whatever you want, whether it's altering the way text scrolls or inventing a whole new "major mode." Topics progress from simple to complex, from lists, symbols, and keyboard commands to syntax tables, macro templates, and error recovery"--Resource description page.

Most of the GNU Emacs integrated environment is written in the programming language called Emacs Lisp. The code written in this programming language is the software (the sets of instructions) that tell the computer what to do when you give it commands. Emacs is designed so that you can write new code in Emacs Lisp and easily install it as an extension to the editor. This introduction to Emacs Lisp is designed to get you started: to guide you in learning the fundamentals of programming, and more importantly, to show you how you can teach yourself to go further.
