Since its introduction in 1979, CHEAPO, a computer based economic analysis program, has allowed users of the Stand Prognosis Model to evaluate silvicultural alternatives from an economic point of view. Subsequent modifications to the Prognosis Model have rendered CHEAPO obsolete. This users guide covers a new computer model, CHEAPO II, which is compatible with version 5.1 of the Prognosis Model and expands its economic analysis capabilities.

education programs in health sciences libraries. Eighteen case studies represent the ideas and approaches of more than fifteen private and public institutions in the United States and the Caribbean. The studies focus on effective end-user programs for medical information electives, veterinary medicine programs, health care informatics, and evidence-based medicine, plus instructional programs for teaching residents, ThinkPad-facilitated instruction, and more. The guide also examines how several medical libraries have created and expanded their end-user education programs. The contributors to *A Guide to Developing End User Education Programs in Medical Libraries* are health sciences librarians from teaching hospitals, medical/dental/veterinary schools, and health professions-focused universities in a dozen U.S. states and the West Indies.
