Musical acoustics or music acoustics is a multidisciplinary field that combines knowledge from physics, psychophysics, organology, physiology, music theory, ethnomusicology, signal processing and instrument building, among other disciplines. As a branch of acoustics, it is concerned with researching and describing the physics of music – how sounds are employed to make music. Examples of areas of study are the function of musical instruments, the human voice, computer analysis of melody ...

Musical acoustics - Wikipedia

Musical Acoustics. Acoustics has been an important influence on music. Many composers have had in mind, consciously or subconsciously, the acoustics of the space in which their music will be played. This page describes how the acoustics of concert halls and churches have influenced musicians. We have only to listen to a piece of music played in the ‘wrong’ type of space to appreciate just how important the acoustics are.

Music Acoustics, Physics, Science, UNSW

ACOUSTICS FOR MUSIC Most of our music making is carried out indoors. In such a situation, the listener's experience is formed almost as much by the room itself as by the instruments. For a successful performance (or recording), the concert space (or studio, or living room with recorded sounds) must fulfill the following:

ACOUSTICS FOR MUSIC

Musical acoustics. Musical acoustics research topics carried out by the Acoustics Research Group include investigating the effect of wall vibrations on the playing characteristics of brass instruments, analysing the importance of the bassoon crook to the instrument's playing properties, monitoring the result of the bending of instrument lead pipes during the manufacturing process, and making bore profile and input impedance measurements on woodwind and brass instruments.

Musical Acoustics | Research Degrees | Open University

Fundamentals of Musical Acoustics is a landmark book in its field, hailed for its astonishingly clear, delightfully readable statement of everything of acoustical importance to music-making. Though
