“Occupy, is at once a vivid portrait of the now-global movement and a practical guide to intelligent activism, infused with Chomsky’s signature meditations on everything from how the wealthiest 1% came to steer society to what a healthy democracy would look like to how we can separate money from politics. Alongside Chomsky’s words are some of the most moving and provocative photographs from the Occupy movement.”

With urgency and clarity, Noam Chomsky speaks with the movement as it transitions from occupying tent camps to occupying the national conscience

"Real-life stories of how banks are ravaging the country--particularly African American communities--and how some families have joined together to fight back. The ongoing economic crisis has created one of the longest and largest mass displacements in U.S. history. While profiting from government bailouts, banks have evicted more than ten million Americans from their homes, destroying their life savings, their economic security and their dreams. Told through the eyes of four families, A Dream Foreclosed reveals the ongoing human tragedy of the crisis--and the spectacular possibilities that emerge when everyday people challenge the all-powerful corporations that the U.S. government considers 'too big to indict.'"--Cover p. [4].

Analyzing the movement's deep-seated origins in questions that the country has sought too long to ignore, some of the greatest economic minds and most incisive cultural commentators - from Paul Krugman, Robin Wells, Michael Lewis, Robert Reich, Amy Goodman, Barbara Ehrenreich, Gillian Tett, Scott Turow, Bethany McLean, Brandon Adams, and Tyler Cowen to prominent labor leaders and young, cutting-edge economists and financial writers whose work is not yet widely known - capture the Occupy Wall Street phenomenon in all its ragged glory, giving readers an on-the-scene feel for the movement as it unfolds while exploring the heady growth of the protests, considering the lasting changes wrought, and recommending reform. A guide to the occupation, THE OCCUPY HANDBOOK is a talked-about source for understanding why 1% of the people in America take almost a quarter of the nation's income and the long-term effects of a protest movement that even the objects of its attack can find little fault with.

Space is both a product and a prerequisite of social relations, it has the potential to block and encourage certain forms of encounter. In Common Space, activist and architect Stavros Stavrides calls for us to conceive of space-as-commons - first, to think beyond the notions of public and private space, and then to understand common space not only as space that is governed by all and remains open to all, but that explicitly expresses, encourages and exemplifies new forms of social relations and of life in common. Through a fascinating, global examination of social housing, self-built urban settlements, street trade and art, occupied space, liberated space and graffiti, Stavrides carefully shows how spaces for commoning are

created. Moreover, he explores the connections between processes of spatial transformation and the formation of politicised subjects to reveal the hidden emancipatory potential of contemporary, metropolitan life.

Occupying Memory investigates the forces of trauma and mourning as deeply rhetorical to account for their capacity to seize one's life. With the Occupy Movement as its guide, the work strives to challenge hegemonic power by keeping memory "in question" and receptive to alternative futures to come.

This book highlights cutting-edge research in the field of network science, offering scientists, researchers and graduate students a unique opportunity to catch up on the latest advances in theory and a multitude of applications. It presents the peer-reviewed proceedings of the fifth International Workshop on Complex Networks & their Applications (COMPLEX NETWORKS 2016), which took place in Milan during the last week of November 2016. The carefully selected papers are divided into 11 sections reflecting the diversity and richness of research areas in the field. More specifically, the following topics are covered: Network models; Network measures; Community structure; Network dynamics; Diffusion, epidemics and spreading processes; Resilience and control; Network visualization; Social and political networks; Networks in finance and economics; Biological and ecological networks; and Network analysis.

In the fall of 2011, a small protest camp in downtown Manhattan exploded into a global uprising, sparked in part by the violent overreactions of the police. An unofficial record of this movement, Occupy! combines adrenalin-fueled first-hand accounts of the early days and weeks of Occupy Wall Street with contentious debates and thoughtful reflections, featuring the editors and writers of the celebrated n+1, as well as some of the world's leading radical thinkers, such as Slavoj Žižek, Angela Davis, and Rebecca Solnit. The book conveys the intense excitement of those present at the birth of a counterculture, while providing the movement with a serious platform for debating goals, demands, and tactics. Articles address the history of the "horizontalist" structure at OWS; how to keep a live-in going when there is a giant mountain of laundry building up; how very rich the very rich have become; the messages and meaning of the "We are the 99%" tumblr website; occupations in Oakland, Boston, Atlanta, and elsewhere; what happens next; and much more.

An exploration of how key terms and words from other movements can help shift consciousness and connect communities of struggle

Years of remodelling the welfare state, the rise of technology, and the growing power of neoliberal government apparatuses have established a society of the precarious. In this new reality, productivity is no longer just a matter of labour, but affects the formation of the self, blurring the division between personal and professional lives. Encouraged to believe ourselves flexible and autonomous, we experience a creeping isolation that has both social and political impacts, and serves the purposes of capital accumulation and social control. In *State of Insecurity*, Isabell Lorey explores the possibilities for organization and resistance under the contemporary status quo, and anticipates the emergence of a new and disobedient self-government of the precarious.
