experienced and understood social and political change in the Age of Revolutions. In particular, they call attention to how Protestants used those changes to continue or accelerate the Protestant imperative of refining their faith toward an improved vision of reformed religion. The editors and contributors define faith broadly: they incorporate individuals as well as specific sects and denominations, and as much of "life experience" as possible, not just life within a given church. In this way, the volume reveals how believers combined the practical demands of secular society with their personal faith and how, in turn, their attempts to reform religion shaped secular society. The wide-ranging essays highlight the exchange of Protestant thinkers, traditions, and ideas across the Atlantic during this period. These perspectives reveal similarities between revolutionary movements across and around the Atlantic.

These efforts produced novel theories of government, encouraged both revolution and counterrevolution, and refined both personal and collective understandings of faith and its relationship to society.
