Social Adjustment and Personality Development in Children ...

Personality and social development. Several theories of personality development stress that adulthood and aging are periods of qualitative change, of discontinuity, and of transformations of earlier life patterns. These changes are believed to arise in relation to the demands of the person's changing biological status and social context—the family, the workplace, and society in general.

Human behaviour - Personality and social development ...

A Prerequisite for Social Adjustment Personality development is outcome of cognitive, emotional, motivational and temperamental attributes that determine child's view about himself, his world and the future. This is influenced a great deal by the type of attachment children form with their primary caregiver during the pre-school years.

Principles of Personality Development in Childhood

Interpersonal relations and attachment are central in social/personality, and appear largely distinct from the study of groups. Attitudes and social cognition are broadly studied, but, in contrast with personality and interpersonal relations, are not structured around a simple core.
