Beyond Sound is a must-read for anyone who loves music technology and wants to build a career in this competitive, fast-paced world. Author Scott L. Phillips draws on his seventeen-year career as a technology trainer and educator, and his extensive network of music technology professionals, to present an intimate view of the exciting world of music technology. The book offers an in-depth consideration of music technology education, including looks at specific programs and a clear explanation of different types of degrees. Moreover, it provides practical guidance on career preparation, including how to get a great internship, how to land that first job, and how to make connections and move up in a variety of businesses from recording to television and film to video games. And Phillips brings stories from successful professionals, who share their experiences, advice, and suggestions.

"The newbie investor will not find a better guide to personal finance." —Burton Malkiel, author of A RANDOM WALK DOWN WALL STREET TV analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. They're wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the bestselling Pound Foolish, he made an offhand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life.

If you are thinking of starting up a business — whether online or in a pushcart or a small café — you need to look into your branding. (how does it work, anyway?), brace yourself... According to Jacky Tai, you should start your branding exercise as early as possible. Brand Zero distills the author's wealth of experience in grappling with branding strategies in the real world into a practical and easy-to-understand guide anyone. About the Authors For a decade, Jacky Tai headed the marketing departments for several companies in the United States and Singapore before he joined International Enterprise Singapore. Heading its branding initiatives, Tai developed revolutionary training programmes that helped various companies — from innovative start-ups to established players — to better understand branding strategies. Jacky is currently Principal Consultant in StrategCom, a B2B branding specialist

Most health professionals have to use computers - at least some of the time. Frequently, those computers are personal computers -the generic name for the ones that are variously known as 'IBM compatible' or 'IBM clones' or just PCs. This separates them out from certain other makes such as the Apple Macintosh, the Amstrad dedicated word processor, the Atari, Amiga and a number of others. This book is about PCs. When you need information about your computer when you are busy, you don't want to have to wade through piles of manuals to find what you need. You often need a fairly straightforward piece of information - now. Computers can be infuriating. When they are up and running properly, they can save time and help you to be more productive. When something goes wrong, they can be extremely frustrating. Once you have called in someone else to fix your problem, it is often apparent that the answer to your problem was only a few keystrokes away. This book aims at supplying you with small chunks of information that can aid your productivity, get you out of awkward corners and help you to become more at home with your Pc. It has been my experience - as a health care lecturer and as a regular com puter user - that you need to develop a certain baseline of confidence in working with them.
