Strategies and Tactics of Behavioral Research and Practice focuses on the most effective methods for measuring and evaluating changes in behavior. The authors provide the rationale for different procedures for measuring behavior and designing within-subject comparisons between control and intervention conditions. The text explains the strengths and weaknesses of methodological alternatives for every topic so that behavioral researchers and practitioners can make the best decisions in each situation. This classic text has been extensively revised to be more accessible and practical. Not only does it feature much more discussion of how research methods are relevant to today's practitioners, it also includes additional examples based on field research and service delivery scenarios. With expanded coverage on creating experimental designs, as well as new chapters on behavioral assessment, the statistical analysis of data, and ethical issues associated with research methods, this book provides a strong foundation for direct behavioral measurement, within-subject research design, and interpretation of behavioral interventions. Enriched with more pedagogical features, including key terms, tables summarizing important points, figures to help readers visualize text, and updated examples and suggested readings, this book is an invaluable resource for students taking courses in research methods. This book is appropriate for researchers and practitioners in behavior analysis, psychology, education, social work, and other social and health science programs that address questions about behavior in research or practice settings.

"This text meets the course outcomes of the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) associate level strategy and tactics course. It provides an overview of common firefighting concepts from fire dynamics to extinguishing agents, to incident management, to fire fighter safety, to building construction, to preincident planning to post incident analysis"--Back cover.

Safe and effective structural firefighting requires a complex thought process. It is not a simple matter of "how to." Decisions depend on many factors, from the type of building, to the likelihood of occupancy, to the water supply. The third edition of Structural Firefighting: Strategy and Tactics leads readers through all phases of planning, evaluation and implementation to enable them to effectively manage structure fire incidents safe and effective manner, regardless of size or complexity. The third edition has been revised to thoroughly cover the practical applications and limitations of the latest research from Underwriters Laboratories (UL) and National Institute of Standards and Technology (NIST).

"This book covers battle tactics at sea from the age of fighting sail to the present, with emphasis on trends (factors that have changed throughout history), constants (things that have not changed), and variables (things pertinent to each individual battle). The third edition highlights advances in unmanned vehicles, artificial intelligence, cyber warfare in peace and war, and other effects of information warfare and how they are changing the ways that battles at sea will be fought and won. It also describes the interaction between naval operations, wartime campaigns, and coalition tactics and their effects on war at sea and points out the growing interaction between land and sea in littoral combat."--Provided by publisher.

The revised edition of this indispensable work still covers battle tactics at sea from the age of fighting sail to the present, with emphasis on trends constants, and variables. Fleet Tactics and Naval Operations continues to emphasize combat data, including how hitting and damage rates and maneuvering have been conducted to achieve an advantage over the centuries. The third edition highlights the current swift advances in unmanned vehicles, artificial intelligence, cyber warfare in peace and war, and other effects of information warfare, and how they are changing the ways battles at sea will be fought and won.
