What most of us think of as the Internet is really just the pretty face of the operation—browser windows, websites, URLs, and search bars. But the real Internet, the brain behind the information superhighway, is an intricate set of protocols and rules that someone had to develop before we could ...

Who Invented the Internet? | Britannica

The invention of money took place before the beginning of written history. [2] [3] Consequently, any story of how money first developed is widely based on conjecture and logical inference. The significant evidence establishes many things were bartered in ancient markets that could be described as a medium of exchange .

Early history. According to Herodotus, more than four thousand years ago natural asphalt was employed in the construction of the walls and towers of Babylon, great quantities of it were found on the banks of the river Issus, one of the tributaries of the Euphrates, and this fact confirmed by Diodorus Siculus. Herodotus mentioned pitch spring on Zacynthus (Ionian islands, Greece).

The history of transport is largely one of technological innovation. Advances in technology have allowed people to travel farther, explore more territory, and expand their influence over larger and larger areas. Even in ancient times, new tools such as foot coverings, skis, and snowshoes lengthened the distances that could be traveled. As new inventions and discoveries were applied to transport ...

The invention of the airplane. On the evening of Sept. 18, 1901, Wilbur Wright, a 33-year-old businessman from Dayton, Ohio, addressed a distinguished group of Chicago engineers on the subject of “Some Aeronautical Experiments” that he had conducted with his brother Orville Wright over the previous two years. “The difficulties which obstruct the pathway to success in flying machine construction,” he noted, “are of three general classes.”
