In local government, territorial distribution of power is the essence. The history of local government in Western Europe, Great Britain, the United States, and Russia exhibits the growing awareness of its significance. This awareness is a product of a development of parochial and town life which began long before the modern state emerged between the 15th and 17th centuries. Any central control over these and other areas was, until the 18th century, rather scanty.

According to the Constitution of the Russian Federation, adopted in 1993, local autonomy is one of the fundamental principles of the constitutional system. The *Politics of Local Government in Russia* aims to provide a dedicated and comprehensive discussion of the pursuit of local self-government in contemporary Russia where "local" refers to the third tier of government beyond federal and regional governments. Some of the ablest scholars in the field focus on the existing institutional and social climate for municipal and district level government in Russia while placing recent reforms in a comparative and historical perspective.

This book is an explanation of the long-standing interrelationship between local government and political parties. It examines and outlines the differences between the political party outside the council and the political party group of councillors within the council. It explores the impact that the party groups have on the conduct of council business, decision-making and policy development and the impact they have on local representation. It addresses two questions that are fundamental to local representative democracy--who or what is it that the councillor represents, and are councillors elected to govern or to serve.

This book offers an overview of the legal, political, and broad intergovernmental environment in which relations between local and state units of government take place, the historical roots of the conflict among them, and an analysis of contemporary problems concerning local authority, local revenues, state interventions and takeovers, and the restructuring of local governments. The author pays special attention to local governmental autonomy and the goals and activities of local officials as they seek to secure resources, fend off regulations and interventions, and fight for survival as independent units. He looks at the intergovernmental struggle from the bottom up, but in the process examines a variety of political activities at the state level and the development and effects of several state policies. Berman finds considerable reason to be concerned about the viability and future of meaningful local government.

A study of local government policy formulation, drawing on developments in economics - such as new institutional economics - and advances in the theories of social capital and leadership. The authors also examine rival minimalist and activist approaches to local government reform.

Gone are the days when the raising and apportioning of municipal monies was a relatively simple task, when ample income could be expected to meet projected needs and also fund a few additional projects. Now local officials are faced with shrinking budgets, tax revolts, decreasing federal support, increasing state and federal regulations--in short, genuine crunches that leave them pondering how sparse resources can ever be stretched to meet the multitude of actual needs. This book stresses the political dimensions of local finance, emphasizing the local, intergovernmental, and private-sector constraints faced by municipal officials in their attempt to provide services while balancing the budget. Integrating the implications of the Reagan administration's new approach to federal spending into their analyses, the authors examine the impact of state regulations on local taxation and debt policies, the relationship between local governments and the municipal bond market, the political economy of New York City's fiscal crisis, and the impact of various tax limitation measures, including California's Proposition 13. They also study the effect of community development grants on local decisionmaking structures and the impact of urban congressional representatives on the allocation of federal grants. Their presentation is aimed especially at graduate and upper-level undergraduate students of urban politics, local finance, state and local government, and intergovernmental relations.
