Velocity

Velocity is equivalent to a specification of an object's speed and direction of motion (e.g. 60 km/h to the north). Velocity is a fundamental concept in kinematics, the branch of classical mechanics that describes the motion of bodies. Velocity is a physical vector quantity; both magnitude and direction are needed to define it.

Velocity - Wikipedia

Like speed, velocity refers to the rate at which an object is moving—the distance per unit of time. But velocity in physics also includes the direction in which the object is moving, whereas direction has no bearing on an object's speed.

Velocity - definition of velocity by The Free Dictionary

Velocity definition, rapidity of motion or operation; swiftness; speed: a high wind velocity. See more.

Velocity | Definition of Velocity at Dictionary.com

the speed at which something is traveling: The wind velocity recorded at the airport was 78 miles per hour at 4 p.m. (Definition of velocity from the Cambridge Academic Content Dictionary © Cambridge University Press) velocity | Business English

VELOCITY | meaning in the Cambridge English Dictionary

Recent Examples on the Web Its velocity in a vacuum, a tad below 300m metres per second, is an absolute upper bound on how fast anything in the universe can travel.

Velocity | Definition of Velocity by Merriam-Webster

Velocity is defined as a vector measurement of the rate and direction of motion. Put simply, velocity is the speed at which something moves in one direction. The speed of a car traveling north on a major freeway and the speed a rocket launching into space can both be measured using velocity.

What Is Velocity in Physics? - ThoughtCo

Velocity Trampoline Park Wigan is the brand new indoor experience for the whole family, just one minute from Junction 25 of the M6, close to the A580.
